

ACTION-CS SURVEILLANCE TRAILER

DEPLOY ANYWHERE | ZERO ONSITE POWER | 24/7 OPERATION | BUILT FOR THE FIELD | MADE IN THE USA

Solar Surveillance. Zero Infrastructure.

The Action-CS Surveillance Trailer delivers fully self-sufficient solar surveillance for construction sites, events, retail lots, and remote locations — operating 24/7 without trenching, utility drops, or permanent infrastructure.

Self-Sufficient Power

- 400–1600W solar array (expandable to 3200W)
- SLA or LiFePO4 battery options
- Smart inverter + intelligent charge control
- Remote health monitoring
- Built for long-duration deployments

Rapid Deployment

- 21-ft telescoping mast (optional extension)
- Stabilized for wind and harsh conditions
- Integrated DC PoE network architecture
- Single-cable camera deployment
- Tow-and-deploy setup

Built for the Field

- Rugged steel chassis
- Off-road suspension system
- Lockable internal equipment bay
- Corner leveling jacks
- Weather-resistant construction

Why Mobile Over Permanent?

Deploy in days, not months

No trenching or utility coordination

Relocate as risk shifts

Protect during construction phases

Preserve capital flexibility

Integrates With

Action-CS Active Deterrence Units | IP Cameras (PTZ & Fixed) | AI Analytics Platforms | Wireless & Cellular Backhaul | Remote Monitoring Systems

Designed to support complete mobile surveillance deployments.

Backed by Real-World Data

Up to 70% reduction in crime-related incidents
